

Authorized update to MUD URLs

Michael Richardson
IETF126 OPSAWG meeting
July 20, 2026

`draft-ietf-iotops-mud-acceptable-
urls-02`

What kind of updates?

- Updates to URL would be restricted to the last component

Now what?

- WG adopted in January, 2021 into **opsawg**
- OPSAWG too busy, IOTOPS rechartered, document moved to IOTOPS in 2025
- Stable for awhile: ****WGLC**** ___???
- Standards track, updating RFC8520.
- QUESTIONS?

Updates to IdevID?

- If IDevID is the most secure, why not update that?
 - Not easy to do for many products, IDevID is ideally stored in TPM
- If the IDevID can be updated, then can a malware update it too?

MUD URLs vs MUD files

- Update MUD file in place
 - PRO: no security problems
 - CON: opens issues with mis-matches of firmware
 - e.g., TLS profiles!
- Update MUD URL, provide new MUD file
 - PRO: every major revision can have specific rules
 - PRO: different operating modes for device can express different preferences
 - (commercial, pro-user, residential)
 - Features enabled via accessories
 - CON: risk that MUD file link could be changed by malware
